

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Previously Presented) A display controlling apparatus, comprising:  
~~data output units being connectable to respective a plurality of display apparatuses, comprising[[:]]~~  
  
a single video memory for storing therein image data at an original resolution utilized for displaying of said display apparatuses; and  
  
a controlling unit for outputting the image data from stored in said said the single video memory to:  
  
(a) each of the plurality of display apparatuses at a lower resolution upon the plurality of display apparatuses being connected, the lower resolution being lower than the original resolution, and  
  
(b) one of the plurality of display apparatuses at the original resolution upon the one of the display apparatuses being connected.  
  
~~each of said display apparatuses at a resolution depending on the number of said display apparatuses, via said data output units, and outputting image data stored in said video memory at an original resolution of said image data when said data output units are connected to one of said display apparatuses.~~
- 2.-15. (Cancelled)
16. (New) A display controlling apparatus of claim 1, wherein the lower resolution depends on how many of the display apparatuses are connected.

Application No.: 10/530,611  
Amendment Dated: September 19, 2007  
Reply to Office Action of: June 21, 2007

ARGM-108US

17. (New) A display controlling apparatus of claim 1, wherein the lower resolution is inversely proportional to the number of display apparatuses connected.
